MR JOHN KOLODZIEJ  
1001 S DULUTH ST  
STURGEON BAY WI 54235

Subject: Change of Project Manager Notification and Status Update Request  
Door County Highway Salt Storage Facility, 10363 Sth 57, Sister Bay, WI  
BRRTS Activity #: 02-15-554088

Dear Mr. Kolodziej,

The Wisconsin Department of Natural Resources (DNR) is informing you of a change in project manager for the Door County Highway Salt Storage Facility site. All future correspondence should be directed to the following:

Wisconsin Department of Natural Resources  
Attn: Karen Campoli  
2984 Shawano Ave  
Green Bay, WI 54313-6727

On December 31, 2019, the DNR received a Status Update of the most recent sodium and chloride sampling associated with the Door County Salt Storage Facility. After reviewing the file, the following items would be helpful to move this site towards closure: (1) Information concerning the KitschInn, located approximately 1,800 feet northeast of the site. This information should include if the private well is still in use or if the property is on municipal water. If the private well is still in use, a chloride sample should be collected to ensure the salt plume has not traveled and impacted this property. (2) The well located at 10397 Sth 57 remains above the Enforcement Standard and has for a number of years. This well should be replaced. Follow the Door County guidelines for well casing and installation.

The DNR is requesting a Status Update for any work associated with this case since the December 31, 2019 update. Please submit a Status Update by **October 19, 2020**. As a reminder, NR 700 Semi-Annual Progress Reports are required until the case is closed. Once this case is ready for closure, a DNR RR Closure Packet should be submitted under the review and signature of a Hydrogeologist, as outlined in NR 712.

If you have any questions, please contact me at (920) 510-4349 or feel free to email me at [karen.campoli@wisconsin.gov](mailto:karen.campoli@wisconsin.gov). I look forward to working with you.

Sincerely,

Karen Campoli  
Hydrogeologist
